

About Us

The **Injury Treatment Center New Orleans (ITCNO)** specializes in the diagnosis and personalized treatment of acute and chronic pain conditions through various techniques of interventional pain, coordinated by our double board-certified physicians. Primarily focused on the personal injury patients, we work accordingly with local healthcare physicians, surgeons, and attorney firms in coordinating the care of our patients.

When working with ITCNO, you can expect quality healthcare, professional staff, and timely reports. Seeking the best treatment for patients is our objective, utilizing the latest medical evidence and procedures is our strategy.

SPECIALISTS"

INJURY
TREATMENT CENTER
NEW ORLEANS

At **Injury Treatment Center New Orleans** (ITCNO), we offer the latest procedures in interventional pain medicine. Following a detailed consultation with one of our double board-certified physicians, our patients will discuss their option(s) for treatment, and their attorney will be provided with a comprehensive quote prior to the procedure. Below is a list of the **most common treatments** that are performed in our facility. Please visit our website for a complete list of procedures, along with educational videos for your reference.

Procedure List

(Sedation is available)

- Epidural Steroid Injection (ESI)
- Transforaminal Steroid Injections
- Facet Injections
- Medial Branch Block (MBB)
- Facet Radiofrequency Neurotomy (RFA)

Scheduling- (504) 509-7400

We make scheduling easy!

Please let our staff know if we can provide transportation for the patient- we are happy to coordinate! Spanish translations are also available. We are also happy to accommodate other unique requirements for our patients.

To schedule a new patient, or for information on a current patient, please call our office directly, (504) 509-7400 or email: info@injuryandtreatmentcenter.com.

Now Offering RightEye- mTBI Testing

The RightEye tool is a fast and easy computerized test that links eye movement function to brain performance, helping us objectively diagnose neurological injuries like concussions and minor traumatic brain injuries. Providing tailored reports to assist in establishing causation of mTBI cases.
